Swansea University selects Relais ILL Hosted Service

Relais International is pleased to announce that the Swansea University Library in Swansea, Wales has selected Relais ILL as their ILL management and Document Delivery system. The system will be hosted by Relais International in our offices in Ottawa, Canada. The system will include the Relais Access web-based pages that allow library patrons to create and monitor their own ILL requests. Relais ILL will interface with the library's Voyager integrated Library System.

The system also includes the Relais Scanning Module. The Scanning Module is fully integrated with Relais ILL for seamless electronic delivery of items to patrons and to other libraries. Library staff can convert paper documents to electronic format by scanning, or they can use existing electronic documents (TIFF and PDF formats) anywhere on their network for desktop delivery to their patrons. Delivery can be done via FTP to Ariel, Odyssey, Post to Web, Email attachment, or fax. The system can also receive electronic documents from Ariel and Odyssey workstations from other libraries.

Swansea University offers over 30 fields of study at the undergraduate and postgraduate levels. Clare MacKeigan, COO of Relais International, is pleased to welcome Swansea University to our growing family of customers. Swansea University is our second customer in the U.K.

Relais™ International Inc is based in Ottawa, Canada and has been selling systems to support interlibrary loan and document delivery services since 1996. Relais International (www.relais-intl.com) assists libraries in implementing intelligent and automated methods to support the delivery of documents. Relais products range from scanning stations through to fully integrated request management, scanning and delivery software suitable for a single library through to a consortium.
