**FOR IMMEDIATE RELEASE**  
**August 11, 2008**

## **University of New England selects Relais ILL**

Relais International is pleased to announce that the University of New England in New South Wales, Australia has selected and is implementing Relais ILL as their ILL management system. The system will be hosted by Relais International in our offices in Ottawa, Canada. The system will include the Relais Access web-based pages that allow library patrons to create and monitor their own ILL requests and the self-registration module so that patrons can register themselves for the ILL services.

The system also includes the Relais Scanning Module. The Scanning Module is fully integrated with Relais ILL for seamless electronic delivery of items to patrons and other libraries. Library staff can convert paper documents to electronic format by scanning, or they can use existing electronic documents anywhere on their network for desktop delivery to their patrons. Delivery can be done via FTP to Ariel, Odyssey, Post to Web, Email attachment, or fax.

Clare MacKeigan, COO of Relais International, is pleased to welcome the University of New England to the growing list of academic and research libraries in Australia that have implemented the Relais ILL system.

**Relais™ International Inc** is based in Ottawa, Canada and has been selling systems to support interlibrary loan and document delivery services since 1996. Relais International ([www.relais-intl.com](http://www.relais-intl.com)) assists libraries in implementing intelligent and automated methods to support the delivery of documents. Relais products range from scanning stations through to fully integrated request management, scanning and delivery software suitable for a single library through to a consortium.
