
FOR IMMEDIATE RELEASE
February 22, 2008

Relais International is pleased to announce that the University of Regina (Regina, Saskatchewan) has selected Relais ILL as their ILL management system. The Relais ILL system will be hosted by Relais International in our offices in Ottawa, Canada.

The Relais ILL system includes the Relais Access web-based pages that allow library patrons to create and monitor their own ILL requests. The system also includes the Relais Scanning Module. The Scanning Module is fully integrated with Relais ILL for seamless electronic delivery of items to patrons and other libraries. Library staff can convert paper documents to electronic format by scanning, or they can use existing electronic documents anywhere on their network for desktop delivery to their patrons. Delivery can be done via FTP to Ariel, Post to Web, or Email attachment.

“We are extremely pleased to add another Canadian University to our growing customer base” says Clare MacKeigan, COO of Relais International. The University of Regina will implement the Relais ILL Service over the Spring/Summer of 2008.

Relais™ International Inc is based in Ottawa, Canada and has been selling systems to support interlibrary loan and document delivery services since 1996. Relais International (www.relais-intl.com) assists libraries in implementing intelligent and automated methods to support the delivery of documents. Relais products range from scanning stations through to fully integrated request management, scanning and delivery software suitable for a single library through to a consortium.
