Intelligent, Flexible, Open Solutions

For Immediate Release March 25, 2008

Relais International announces the launch of the newest release of Relais ILL and Relais Enterprise, our ILL Management and Document Delivery systems. Version 2008 includes several new features and enhancements to our Web Services, our OpenURL interface, our support for the NCIP protocol. Also part of the release is the addition of standard reports, and support for additional scanners such as the Widetek Scanner and the Bookeye Planetary Scanner.

Several of our customers have migrated to Version 2008 to date, and many more are planning their migration over the next few months.

Relais™ International Inc is based in Ottawa, Canada and has been selling systems to support interlibrary loan and document delivery services since 1996. Relais International (www.relais-intl.com) assists libraries in implementing intelligent and automated methods to support the delivery of documents. Relais products range from scanning stations through to fully integrated request management, scanning and delivery software suitable for a single library through to a consortium.
